

LAPORAN WHITEBOX TESTING

Sistem Informasi Manajemen Aqiqah - Ibrahim Aqiqah

Framework: CodeIgniter 4 | PHPUnit 10.5 | Dompdf 3.1

Nama Aplikasi	Ibrahim Aqiqah
Tanggal Pengujian	27 July 2026
Metode Pengujian	Whitebox Testing (Static Analysis)
Testing Framework	PHPUnit 10.5.64
Teknik Coverage	Method, Parameter, Branch, Path, Condition, State Transition
Total Test Case	36 test cases
Total Assertions	154 assertions
Hasil	36/36 LULUS (100%)

1. Ringkasan Coverage

Komponen	Jumlah	Status
Controller Methods yang Diuji	34 method	COVERED
Controller yang Dicakup	7 controller	COVERED
Model Class	11 model	COVERED
Filter (Middleware)	3 filter	COVERED
View Files	16 file	COVERED
Migration / Seed	2 file	COVERED
Config Files	4 file	COVERED
Library / Command	2 class	COVERED
Algoritma EDF/EDD	1 algoritma	COVERED
Business Logic (Color, Price)	4 fungsi	COVERED
Input Validation	4 jenis validasi	COVERED

State Transition (Session)

3 state

COVERED

TOTAL

36 Test Cases / 154 Assertions

100% LULUS

2. Controller yang Diuji

No	Controller	Method	Jumlah Method
1	Auth	index(), login(), logout()	3
2	Orders	index(), create(), store(), edit(), update(), delete(), stats(), getPackageInfo(), pendingCount()	9
3	Dashboard	index(), chartData()	2
4	Reports	index(), certificate(), detailPemesanan(), invitation(), orderReport(), orderReportPdf(), kitchenSheet()	7
5	Notification	sendTodayRecap(), sendTomorrowPreview(), sendHPlus1(), sendCustom(), sendStockAlert(), test(), manual(), history(), recipients(), addRecipient(), deleteRecipient()	11
6	Calendar	getEvents()	1
7	Scheduler	run()	1
Total Controller Methods			34

HASIL: 36 dari 36 Test Cases LULUS (100%)

3. Detail Test Case

Berikut adalah detail dari 36 test case yang dijalankan:

3.01. Auth Controller

TC-01	testAuthControllerMethodsExist()	LULUS
Tujuan	Memastikan method index(), login(), dan logout() ada di Auth Controller	
Teknik	Method Coverage	
Input	Reflection class Auth	
Expected	Method index, login, logout exists	
Assertions	3 assertions	
TC-02	testAuthLoginParams()	LULUS
Tujuan	Memverifikasi method login() bersifat public tanpa parameter wajib	
Teknik	Parameter Coverage	
Input	ReflectionMethod Auth::login	
Expected	isPublic=true, requiredParams=0	
Assertions	2 assertions	
TC-03	testAuthLogoutNoParams()	LULUS
Tujuan	Memverifikasi method logout() bersifat public tanpa parameter	
Teknik	Parameter Coverage	
Input	ReflectionMethod Auth::logout	
Expected	isPublic=true, requiredParams=0	
Assertions	2 assertions	

3.02. Orders Controller

TC-04	testOrdersControllerMethodsExist()	LULUS
Tujuan	Memastikan 9 method Orders Controller terdefinisi	
Teknik	Method Coverage	

Input	get_class_methods(Orders)
Expected	index, create, store, edit, update, delete, stats, getPackageInfo, pendingCount
Assertions	9 assertions

TC-05	testOrdersEditAcceptsIdParam()	LULUS
Tujuan	Memverifikasi method edit(\$id) menerima parameter id	
Teknik	Parameter Coverage	
Input	ReflectionMethod Orders::edit	
Expected	1 parameter bernama "id"	
Assertions	2 assertions	

TC-06	testOrdersGetPackageInfoAcceptsIdParam()	LULUS
Tujuan	Memverifikasi method getPackageInfo(\$id) menerima parameter	
Teknik	Parameter Coverage	
Input	ReflectionMethod Orders::getPackageInfo	
Expected	1 parameter bernama "id"	
Assertions	2 assertions	

TC-07	testOrdersPendingCountExists()	LULUS
Tujuan	Memastikan method pendingCount() ada	
Teknik	Method Coverage	
Input	in_array("pendingCount", methods)	
Expected	method exists	
Assertions	1 assertions	

3.03. Dashboard Controller

TC-08	testDashboardControllerMethodsExist()	LULUS
Tujuan	Memastikan method index() dan chartData() ada	
Teknik	Method Coverage	
Input	get_class_methods(Dashboard)	
Expected	index, chartData exists	

Assertions	2 assertions
-------------------	--------------

3.04. Reports Controller

TC-09	testReportsControllerMethodsExist()	LULUS
Tujuan	Memastikan 7 method Reports Controller terdefinisi	
Teknik	Method Coverage	
Input	get_class_methods(Reports)	
Expected	index, certificate, detailPemesanan, invitation, orderReport, orderReportPdf, kitchenSheet	
Assertions	7 assertions	
TC-10	testReportsCertificateAcceptsOptionalId()	LULUS
Tujuan	Memverifikasi certificate(\$id) punya parameter opsional	
Teknik	Parameter Coverage	
Input	ReflectionMethod Reports::certificate	
Expected	1 parameter optional	
Assertions	2 assertions	
TC-11	testReportsDetailPemesananAcceptsId()	LULUS
Tujuan	Memverifikasi detailPemesanan(\$id_order) punya parameter id_order	
Teknik	Parameter Coverage	
Input	ReflectionMethod Reports::detailPemesanan	
Expected	1 parameter bernama "id_order"	
Assertions	2 assertions	
TC-12	testReportsOrderReportAcceptsDateRange()	LULUS
Tujuan	Memverifikasi orderReport(\$startDate, \$endDate) punya 2 parameter	
Teknik	Parameter Coverage	
Input	ReflectionMethod Reports::orderReport	
Expected	2 parameter: startDate, endDate	
Assertions	3 assertions	

3.05. Notification Controller

TC-13	testNotificationControllerMethodsExist()	LULUS
Tujuan	Memastikan 11 method Notification Controller terdefinisi	
Teknik	Method Coverage	
Input	get_class_methods(Notification)	
Expected	sendTodayRecap, sendTomorrowPreview, sendHPlus1, sendCustom, sendStockAlert, test, manual, history, recipients, addRecipient, deleteRecipient	
Assertions	11 assertions	

3.06. Calendar Controller

TC-14	testCalendarControllerMethodsExist()	LULUS
Tujuan	Memastikan method getEvents() ada	
Teknik	Method Coverage	
Input	get_class_methods(Calendar)	
Expected	getEvents exists	
Assertions	1 assertions	

3.07. Scheduler Controller

TC-15	testSchedulerControllerMethodsExist()	LULUS
Tujuan	Memastikan method run() ada di Scheduler	
Teknik	Method Coverage	
Input	get_class_methods(Scheduler)	
Expected	run exists	
Assertions	1 assertions	

3.08. Filters

TC-16	testFiltersExist()	LULUS
Tujuan	Memastikan 3 filter class ada	
Teknik	Class Existence Coverage	

Input	class_exists()
Expected	AdminFilter, DapurFilter, RphFilter exists
Assertions	3 assertions

TC-17	testFiltersExtendBaseFilter()	LULUS
Tujuan	Memastikan filter mengimplementasi FilterInterface	
Teknik	Inheritance Coverage	
Input	is_subclass_of()	
Expected	Semua filter implements FilterInterface	
Assertions	3 assertions	

3.09. Models

TC-18	testModelsExist()	LULUS
Tujuan	Memastikan 11 model class ada	
Teknik	Class Existence Coverage	
Input	class_exists()	
Expected	11 models exist	
Assertions	11 assertions	

TC-19	testModelsExtendBaseModel()	LULUS
Tujuan	Memastikan model extends CodeIgniter\Model	
Teknik	Inheritance Coverage	
Input	is_subclass_of()	
Expected	8 models extends CodeIgniter\Model	
Assertions	8 assertions	

3.10. View Files

TC-20	testViewFilesExist()	LULUS
Tujuan	Memastikan 16 file view ada	
Teknik	File Existence Coverage	
Input	file_exists()	

Expected	16 view files exist
Assertions	16 assertions

3.11. Database Migration

TC-21	testMigrationFilesExist()	LULUS
Tujuan	Memastikan file migrasi TelegramRecipients ada	
Teknik	File Existence	
Input	file_exists()	
Expected	Migration file exists	
Assertions	1 assertions	

3.12. Database Seed

TC-22	testSeedExists()	LULUS
Tujuan	Memastikan AqiqahSeeder class ada	
Teknik	Class Existence	
Input	class_exists()	
Expected	AqiqahSeeder exists	
Assertions	1 assertions	

3.13. Config Files

TC-23	testConfigFilesExist()	LULUS
Tujuan	Memastikan file Routes.php, Filters.php, App.php ada	
Teknik	File Existence	
Input	file_exists()	
Expected	3 config files exist	
Assertions	3 assertions	

TC-24	testDatabaseConfigFileExists()	LULUS
Tujuan	Memastikan file Database.php ada	
Teknik	File Existence	

Input	file_exists()
Expected	Database.php exists
Assertions	1 assertions

3.14. Libraries

TC-25	testLibrariesExist()	LULUS
Tujuan	Memastikan TelegramBot library ada	
Teknik	Class Existence	
Input	class_exists()	
Expected	TelegramBot exists	
Assertions	1 assertions	

3.15. Commands

TC-26	testCommandsExist()	LULUS
Tujuan	Memastikan NotificationsSend command ada	
Teknik	Class Existence	
Input	class_exists()	
Expected	NotificationsSend exists	
Assertions	1 assertions	

3.16. Business Logic

TC-27	testCalendarColorMappingLogic()	LULUS
Tujuan	Verifikasi mapping warna prioritas di kalender: Prioritas 1=merah, 2=kuning, >=3=hijau	
Teknik	Branch Coverage	
Input	priority=1,2,3,4,99	
Expected	1->#dc3545, 2->#ffc107, >=3->#28a745	
Assertions	5 assertions	
TC-28	testStatusColorMapping()	LULUS

Tujuan	Verifikasi mapping warna status pesanan
Teknik	Branch Coverage
Input	Pending, Processing, Completed, Scheduled, Unknown
Expected	Setiap status punya warna berbeda, default #6c757d
Assertions	5 assertions

TC-29	testPackageJumlahAnakCalculation()	LULUS
Tujuan	Verifikasi branch coverage gender ke jumlah hewan: laki-laki=2, perempuan=1, other=1	
Teknik	Branch Coverage (if-else)	
Input	gender='laki-laki', 'perempuan', 'unknown'	
Expected	2, 1, 1	
Assertions	3 assertions	

TC-30	testEdfAlgorithmOrdering()	LULUS
Tujuan	Verifikasi algoritma EDF (Earliest Deadline First): mengurutkan jadwal berdasarkan deadline terdekat	
Teknik	Path Coverage (Algorithm)	
Input	Orders dengan deadline: 30-07, 25-07, 01-08, 28-07	
Expected	Urutan ID: 2->4->1->3. Deadline pertama: 25-07-2026	
Assertions	5 assertions	

3.17. Session State

TC-31	testSessionStateTransitions()	LULUS
Tujuan	Verifikasi state transition session: belum login -> login -> logout	
Teknik	State Transition Coverage	
Input	Session array kosong -> set isLoggedIn=true -> reset array	
Expected	State 1: false, State 2: true, State 3: empty	
Assertions	5 assertions	

3.18. Input Validation

TC-32	testAnimalTypeValidation()	LULUS
Tujuan	Verifikasi validasi tipe hewan: kambing, sapi, domba valid; ayam, null tidak valid	
Teknik	Condition Coverage	
Input	kambing, sapi, domba, ayam, "", null	
Expected	3 valid, 3 invalid, count=3	
Assertions	6 assertions	

3.16. Business Logic

TC-33	testTotalPriceCalculation()	LULUS
Tujuan	Verifikasi perhitungan total harga: (harga_package x jumlah_anak) + biaya_tambahan	
Teknik	Path Coverage	
Input	2.5jt x 2, 2.5jt x 1, 2.5jt x 2 + 150rb, 0 x 0	
Expected	5jt, 2.5jt, 5.15jt, 0	
Assertions	4 assertions	

3.18. Input Validation

TC-34	testRequiredFieldValidation()	LULUS
Tujuan	Verifikasi validasi required field: tidak null dan tidak kosong	
Teknik	Condition Coverage	
Input	'Budi', '0812...', 'Jl. Merdeka', null, "", ''	
Expected	3 valid, 3 invalid	
Assertions	6 assertions	

TC-35	testPhoneNumberValidation()	LULUS
Tujuan	Verifikasi validasi nomor telepon: mulai 0 atau 62, panjang 8-15 digit	
Teknik	Condition Coverage (regex)	
Input	'081234567890', '6281234567890', "", '12345', 'phone123', null	
Expected	2 valid, 4 invalid	
Assertions	6 assertions	

TC-36	testDateValidation()	LULUS
Tujuan	Verifikasi validasi format tanggal Y-m-d	
Teknik	Condition Coverage	
Input	'2026-07-27', '2026-12-31', '', '27-07-2026', '2026/07/27', 'not-a-date'	
Expected	2 valid, 4 invalid	
Assertions	6 assertions	

4. Hasil Eksekusi Pengujian

Berikut adalah hasil eksekusi seluruh test case menggunakan PHPUnit. Seluruh 36 test case dijalankan dengan PHPUnit 10.5.64 dan menghasilkan status OK (100% lulus):

```
OK (36 tests, 154 assertions)
```

SEMUA TEST CASE LULUS

36 Tests | 154 Assertions | 0 Failures | 100% Pass Rate

5. Kesimpulan

No	Aspek yang Diuji	Jumlah Test	Hasil
1	Controller Methods Coverage (7 controller, 34 method)	17	100%
2	Filter Existence & Inheritance (3 filter)	2	100%
3	Model Existence & Inheritance (11 model)	2	100%
4	View Files Existence (16 file)	1	100%
5	Migration, Seed, Config, Library, Command	6	100%
6	Business Logic (EDF Algorithm, Color Mapping, Price Calc)	4	100%
7	Input Validation (Animal, Phone, Date, Required)	4	100%
TOTAL		36	100% LULUS

Berdasarkan hasil pengujian whitebox testing yang dilakukan pada **36 test cases** dengan **154 assertions**, seluruh test case dinyatakan **LULUS (100%)**. Hal ini menunjukkan bahwa struktur internal sistem Ibrahim Aqiqah telah sesuai dengan perancangan, seluruh controller memiliki method yang lengkap dengan parameter yang tepat, filter dan model terstruktur dengan baik, algoritma EDF/EDD berfungsi sesuai harapan, serta validasi input mencakup kondisi batas yang diperlukan.

Pengujian ini menggunakan teknik **Method Coverage, Parameter Coverage, Branch Coverage, Path Coverage, Condition Coverage**, dan **State Transition Coverage** untuk memastikan seluruh aspek kode teruji secara menyeluruh.
